

# S.M.A.R.T.S.

*State Message Alert, Review and Tracking System*

**SMARTS** – is a web-based NCIC broadcast/teletype message review and tracking system. SMARTS introduces improved productivity and accountability by reducing human error and incorporating the latest web-based technology to receive, organize and display state teletype messages.

- **NEVER MISS A HIT CONFIRMATION AGAIN!** all hit confirmation messages are highlighted
- Uses built-in logic to determine message type and urgency for superior response time and message handling
- Allows TAC officers to review and validate teletype messages from any workstation in the agency
- Authorized personnel can search through archived teletype data. Messages can be emailed, printed and reviewed
- **Go Green!** – Only print messages that are needed (huge cost savings on paper and toner)
- Web-based database driven application
- Accountability/Audit Trail (records user info when messages are viewed)
- Searchable (searches and marks messages destined for your department)
- Multi-department environment (SMARTS will search for ORIs of multiple agencies on the same system)
- NJSP Audit tool (takes the stress out of NJSP audits)
- Automated database cleanup (purges messages using user-defined time settings)
- **Standalone PC hardware included**
- NJSP approved
